COMPANY OVERVIEW

Data Solution Global is a Washington DC–area **Service-Disabled Veteran-Owned Small Business (SDVOSB)** delivering enterprise-grade IT solutions to government and commercial clients. We bring a mission-first mindset to every engagement, with security architected from day one and **100% U.S.-based** delivery teams meeting rigorous government requirements.

→ **Mission-first culture**

Military-grade discipline and accountability in every deliverable.

Security built in

Compliance-minded engineering — not bolt-on afterthoughts.

Set-aside ready

VA-verified SDVOSB supporting agency small business goals.

CORE CAPABILITIES

Cybersecurity

Zero Trust architecture, CMMC readiness, FedRAMP, FISMA, and SOC 2. Threat detection, vulnerability management, and identity & access management.

Cloud solutions

AWS GovCloud and Azure migrations, cloud-native architecture, DevSecOps pipelines, infrastructure automation, and disaster recovery for government resilience.

Data analytics & BI

Enterprise data warehouses, ETL/ELT pipelines, Power BI and Tableau dashboards that turn fragmented agency data into governance-grade intelligence.

Data science

Advanced analytics and data science aligned to mission outcomes and responsible use of data across complex environments.

Artificial intelligence & ML

AI-powered automation, machine learning models, NLP solutions, and intelligent decision-support for federal and commercial requirements.

IT consulting & PM

Agile/Scrum program management, IT strategy, enterprise architecture, staffing solutions, and PMBOK-aligned delivery.

Software development

Custom applications, legacy modernization, DevSecOps pipelines, and full lifecycle delivery for mission-critical programs.

Digital transformation

Modernization roadmaps, process automation, citizen-centric platforms, and change management for measurable innovation.

IT talent solutions

Cleared staffing, surge support, and workforce solutions across cybersecurity, cloud, data, and software.

Financial mgmt & audit readiness

Federal financial systems modernization, FISCAM compliance, audit readiness, ERP implementations, and CFO-aligned optimization.
